NOTICE:
COVID-19 precautions to be implemented for trash collection and recycling

For the safety of workers and overall sanitation, COVID-19 precautions are being extended to the Recycling Center and curbside trash collection in the City of Greer.

ACE Environmental of South Carolina, LLC., the City’s contractor for curbside trash collection, is practicing social distancing by reducing its crew sizes in an effort to continue their operations throughout the crisis. It has closed the City Recycling Center to protect workers and visitors from spread of the virus.

As an additional measure for curbside collection beginning immediately:

1. Ensure that all garbage is bagged and placed inside the roll cart. No additional materials or bags may be outside the cart.

2. All recyclable items must be in the recycling container. No loose items on the ground will be collected.

3. No bulk goods (furniture, large appliances, mattresses, toilets, etc.) will be collected.

4. Halt or restrict brush to small loads. Residents should only place at curb what can be collected by one person. The blue yard cart should be used if available. Collection will be on a reduced pace. Delays should be expected.

Residents should be aware that crews’ first priority will be clearing garbage and limiting workers’ exposure to loose materials. Properly bagging and limiting the amount of garbage workers must touch will help protect their health and preserve ongoing collection.

These measures will be in effect until further notice. Thank you for your assistance and patience as we all work to maintain regular services during this time.
